EDUCATION

B.E in Computer Science and Engineering

Don Bosco Institute Of Technology (7.8CGPA)

07/2019 - 08/2023 *Bangalore, Karnataka*

WORK EXPERIENCE

Lead Developer

Webranc

07/2022 - 2023 *India*

Achievements/Tasks

- Guided a talented full-stack development **team** in building a **multi-seller e-commerce platform**, similar to Amazon. Managed the entire development process and ensured a robust backend structure.
- Developed a **secure** and **scalable** system for user **authentication**, allowing seamless access across various servers and international locations. Used strong **JavaScript**, **TypeScript**, **Node.js,** and **Express.js** skills to address complexities and ensure compliance with security standards.
- Implemented **Elasticsearch** for advanced search capabilities, **RabbitMQ** for a robust messaging system, and **Redis** for efficient caching in a multi-seller e-commerce platform. This comprehensive approach optimized data retrieval, reduced latency, and contributed to a responsive, scalable, and seamless user experience.

React Developer

Open Cubicles

11/2021 - 04/2022 *Bangalore, India*

Achievements/Tasks

- Developed a post-checkout upsell flow, constructed a **page builder**, and implemented **logic builders**. Additionally, proficient in leveraging Python for **web scraping** functionalities.
- Adept in working with a diverse range of languages, platforms, and frameworks including JavaScript, React, Netlify, Shopify, Leaflet, Tailwind, and Python. Experience extends to coding web scrapers, showcasing versatility in technology stacks.

Freelancer - Developer, Tutor

Fiver

09/2021 - 2023

Achievements/Tasks

- Assisted clients in proficiently debugged and completed client projects, offering expertise in **teaching**, **debugging**, project finishing, **website cloning**, and undertaking new initiatives.

SKILLS

Node js | React js | Dev Ops | Linux | NextJs | Git | MongoDB | Javascript | Flutter | Typescripy | Elastic Search | Rabbit MQ | Redis | Backend | SQL | FrontEnd | S3/ R2 | Photoshop

PERSONAL PROJECTS

RandomChatPro (10/2020 - 02/2021)

- I created a global web platform for connecting users with shared interests and gender preferences. Featuring **real-time communication** using Socket.io, the application, built with **Next.js**, facilitates random connections, **multiplayer Flappy-Bird game**, and the creation of personalized public chat rooms. **Tailwind** CSS ensures a modern and responsive design.

Persona (12/2021 - 01/2022)

- Created a web app for journaling, where users write and **store diaries privately or share them publicly**. Subscriptions notify users of new public diaries. Part of a college DBMS project, it's built with Next.js, Tailwind CSS for styling, and **PostgreSQL** for the database.
